FOR IMMEDIATE RELEASE

The Burke Company Travels to Thousand Oaks To Participate in Remodeling Roundtable Conference

Dallas, TX – Tuesday, November 15, 2005 - The Burke Company, one of Dallas' most prestigious design, build, and remodeling firms, recently attended the Remodelers Executive Roundtable, a unique event focused on the Design/Build remodeling industry. The three-day event was held in Thousand Oaks, California.

The Remodelers Executive Roundtable brings together representatives from the top remodeling firms in the nation. Each participant brings unique ways of doing business to the group. The purpose is to share those methods and learn from their peers.

The Burke Company specializes in the Design/Build/Remodel system of home renovation and construction. They offer both creative design and quality construction under one umbrella. Consumers can take advantage of the one-stop shopping model that has been a part of the Burke Company system for over 46 years. According to Jason Asmar, President of The Burke Company, "We are proud to take responsibility for the entire project from beginning to end. This system avoids the finger pointing that often occurs when an architect designs the project and then hires various sub-contractors to build it."

The Burke Company's designs can be seen at numerous homes throughout historic Lakewood, White Rock, and Preston Hollow areas of Dallas.
